SUMMARY

Creative and detail-oriented full stack software engineer with a deep interest in web and API development. Proven track record of creating and implementing successful front and back end web applications.

WORK EXPERIENCE

Software Engineer at 100Devs, Los Angeles, CA

September 2020 — Present

- Collaborated closely with a team of developers to build modern and responsive and user-friendly web applications using industry best practices of front-end and back-end technologies
- Provided user-end technical support regarding version control and software architecture
- Worked alongside local small businesses to design, deploy and maintain web pages to enhance their online presence

Recent Projects:

Go Social & Fitness (Fullstack Application) – Users can login to their profile and have the ability record and edit exercises which get stored in a database for exercise documenting purposes. Users can also upload and share workout routines with other users.

Homework Bound Assignment Tracker (Fullstack Application) – Students can login to their profile to view a list of assigned school work. Users can also archive and add comments to their completed assignments. Teachers can log in to assign work to students and comment on their progress.

Audit Compliance Analyst @ CalPERS | Sacramento, CA

June 2020 — Present

- Worked with public agencies across California, utilizing the myCalPERS database to analyze payroll and contract data for Public Agency Reviews.
- Provided user-end technical support inside the myCalPERS system regarding complex financial reports
- Participated in JAR/JAD/UAT phases for system enhancement to help develop section/division annual plans

Payroll Analyst @ CalPERS | Sacramento, CA

May 2019 — June 2020

- Analyzed XML file payroll data on behalf of public agencies to conform with CalPERS reporting standards
- Worked within the myCalPERS Test Environment to replicate, troubleshoot, and resolve issues.
- Provided technical support to user-end employers regarding the utilization of functions and components within the myCalPERS system.
